

Journey: Think Like a Citizen Scientist

with

Our world is filled with science. Science is very important in helping us and our planet. In this journey, you will learn how to observe, collect information, and take action. The most important thing is how you use science to create solutions that will make our world a much better place to live in!

STEP 1 Find out how scientists use the scientific method to investigate the world and make discoveries by watching these 2 videos on Nakira's World YouTube channel:

Click here

What is Energy?

Kinetic Energy

STEP 2 Learn how to make observations and collect data by completing our activities. Print and answer these 2 work sheets that talk about energy.

What Do They Make?

Source of Energy

STEP 3 - SHARE

Plan a Take-Action-project that helps others by showing “How To Conserve Energy”.

Do the following:

Take a video of yourself or your troop talking about a few ways you can help conserve energy. Be as creative as possible!

OR

Draw your ideas as a poster or make a comic showing different ways you can conserve energy!

Before having your guardian or troop leader upload your drawing, comic, or video, have them fill out the form.
